PROFESSIONAL SUMMARY

Detail-oriented Data Analyst (Fresher) with strong academic and project-based exposure, backed by 3 years of professional experience in LiDAR data annotation and quality-driven data workflows. Recently completed a comprehensive Data Analytics course, gaining hands-on experience in Python, SQL, Power BI and Excel. Strong in data cleaning, exploratory data analysis (EDA), statistical analysis, and dashboard development. Experienced in handling large datasets, validating data quality, identifying patterns, and translating data into actionable business insights.

TECHNICAL SKILLS

Programming & Analysis	Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (Joins, Subqueries, CTEs, Window Functions)
Data Analysis	Data Cleaning, EDA, Missing Value Treatment, Outlier Detection, Data Transformation, Feature Preparation
BI & Visualization	Calculated Fields, LOD Expressions, Dashboards, Filters & Parameters, Power BI (DAX, KPIs, Data Modeling)
Databases & Tools	MySQL, SQL Server, AWS-based data workflows (Data Validation & Quality Checks)
Excel	XLOOKUP, VLOOKUP, Pivot Tables, Dashboards

PROFESSIONAL EXPERIENCE

Objectways Technologies, Karur

Dec 2021 – Mar 2024 | LiDAR Data Analyst | Senior Analyst

- Worked on 2D/3D LiDAR annotation for AI/ML model training, including point cloud bounding boxes, segmentation, and object classification.
- Handled large-scale datasets and performed data validation, quality checks, and error analysis to maintain accuracy and project standards.
- Collaborated with QA teams and project leads to resolve annotation issues and improve dataset reliability.

Iva Technology, Coimbatore

Jun 2025 – May 2026 | Quality Analyst

- Performed quality validation and review of 2D/3D LiDAR annotations, identifying errors and inconsistencies across large-scale datasets.
- Reviewed bounding boxes, segmentation, and object classification against project guidelines and quality standards.
- Worked with annotation teams to resolve defects and maintain accuracy, consistency, and productivity benchmarks.

PROJECTS

Healthplus Care Database | SQL

Designed a relational database for 18 clinics and 220+ specialists, leveraging advanced SQL joins, subqueries, and CASE statements to analyze fee structures, identify pricing variances, and support clinic fee optimization.

GitHub

FreshMart Sales Dashboard | Excel

- FreshMart's grocery sales data (2,500+ transactions across customers, products, stores, employees, and suppliers) existed as disconnected raw tables with no tailored view for different business functions.
- Built a role-based Excel dashboard so Store Managers, Product Managers, Marketing, Operations, and Executive/Finance teams could each get insights relevant to their function from the same dataset.
- Enabled each stakeholder group to self-serve relevant metrics from one workbook, revealing insights such as Gold-tier members spending ~₹1,673 per order versus ~₹721 for Bronze-tier, informing loyalty-program targeting and category investment decisions.

GitHub

TrendKart Fashion Sales Analysis Dashboard | Excel

- Cleaned and transformed retail sales data using Excel functions and PivotTables.
- Built a dynamic dashboard to monitor key sales metrics and trends for business decision-making.
- Applied analytical thinking and problem-solving to diagnose a 30.6% month-over-month sales decline, then communicated findings and recovery recommendations in simple, clear language for business stakeholders.

EDUCATION

Bachelor degree in Computer Science

Jairam Arts and Science College | 2016 – 2018

CERTIFICATION

MySQL Basics – HackerRank
Using Generative AI Tools to Learn Python – Infosys Springboard
Data Analytics using Excel – HackerRank
